

## **Dr Anita SMITH – WA**

Dr Anita Smith commenced her internship in 2018 and is currently continuing her clinical work at Sir Charles Gairdner Hospital in Perth as a Peri-operative RMO.

As the Committee Liaison Representative for the RMO Society at the Sir Charles Gairdner Hospital in 2019, Dr Smith collaborated extensively with the Medical Executive and Innovations team and contributed to important strategic and organisational projects. These include the establishment of the new After-hours Team, improving JMO Rostering and JMO leave processes.

Anita is a research investigator on a project with the skin health team and has co-authored a chapter in a book on rheumatic heart disease, yet to be published. She has also presented at state, national and international conferences.

Due to her passion for improving education and training in rural health and encouraging other junior doctors to get involved with research early in their careers, Anita was appointed a WA Country Health Service Medical Education Register in 2019.

She is passionate about JMO welfare and wellbeing and contributes to her Hospital's Medical Staff Culture and Wellbeing Working Group and the AMA Doctors in Training Welfare Committee.

Anita has been involved with the Postgraduate Medical Council of WA JMO Forum and was the Forum's representative for the Education Committee, and on the Accreditation and Standards Committee in 2019. She is co-chair of the JMO Forum for WA in 2020, and represents WA on the Australasian Junior Medical Officers Committee.
